Select Science & Tech Agencies/Programs in FY 2018 Appropriations

Estimated percentage change from FY 2017 enacted levels, nominal dollars

Based on the FY 2018 budget request, the FY 2017 omnibus, and current appropriations.

*Includes renewables and efficiency, nuclear, fossil, grid research, ARPA-E. **Flat in omnibus.
FY 2018 Omnibus Notes

- Adopted last March
- ~11% increase for research spending
  - Largest in 15 years (in regular appropriations)
  - All-time high for research and total R&D (est.)
- Emergent priorities:
  - Exascale computing; fusion research; user facilities
  - Weather research
  - Defense materials and manufacturing
  - NIH initiatives including opioids
  - NASA: planetary science and exploration
  - Several energy programs saved/boosted
  - Competitive agricultural research grants
  - Natural hazards research and monitoring
- Climate research, manufacturing programs protected
- Gun violence research permitted
- More than $3 billion for opioids research, surveillance, response (CDC, NIH, SAMHSA, Justice, FDA, etc)
- Also modest increases for NEH, NEA

*Using old definition, including DOD 6.7 account as R&D. The new official definition excludes this account from R&D. Based on OMB and agency data, and AAAS estimates from FY 2017 and FY 2018 appropriations. © 2018
Science Agency Budget Increases Since January 2017

Percent change from FY 2016 - FY 2018, nominal dollars

Source: agency budget documents and appropriations. Note: inflation is 3.3% over this time. | AAAS 2018

Limits on NONDEFENSE Spending

Billions of constant 2018 dollars

- Actual Caps w/ Congress Adjustments
- Pre-Sequester Caps
- Sequester Caps
- President's FY 2019 Budget After Revision
- President's Original FY 2019 Budget

*Current caps last through 2021. Based on past and current budget resolutions, the Budget Control Act and subsequent legislation, and the FY 2019 OMB summary tables. © AAAS 2018
Composition of the Proposed FY 2019 Budget

Total Outlays = $4.4 trillion

outlays in billions of dollars

- Defense Discretionary: $618
- Nondefense Discretionary*: $563
- Defense R&D: $60
- Nondefense R&D*: $63
- Social Security: $1,047
- Medicare: $625
- Medicaid: $412
- Other Mandatory: $656
- Net Interest: $363

*Totals do not include last-minute additions of several billion dollars in response to passage of the Bipartisan Budget Act of 2018.

Source: Budget of the United States Government FY 2019. Projected deficit is $984 billion. © AAAS 2018
Select Science & Tech Agencies and Programs in the FY 2019 Budget

Estimated percentage change from FY 2018 enacted omnibus, nominal dollars

- DARPA
- NIH
- NSF
- DOE Science
- NASA
- USDA R&D
- NOAA Research
- DHS S&T
- EPA S&T
- NIST
- DOE Tech*

*Includes renewables and efficiency, nuclear, fossil, grid research, cybersecurity, ARPA-E. | AAAS
Spending Bill Progress Check

- **All twelve bills** are through the Appropriations Committees in both chambers

- **Five out of twelve bills** have been fully adopted by Congress and signed into law before the start of the fiscal year October 1
  - Covering Defense, Energy, HHS, Veterans Affairs, Education
  - Fastest pace in 22 years

- **The remaining seven bills** are under a CR until December 7
Our **basic research** estimate: $39+ billion, increases of 3-5%
Our **total R&D** estimate: $145-$150 billion, increases of 2-6%

Would push total research spending to all-time high (or close to it), keeping it fairly consistent with historical average as a share of GDP (around 0.40%)
Department of Defense

- **Basic research**: +8% to $2.5 billion
  - All-time high, spread across all military branches
  - Splits difference between BIG Senate boost and modest House reduction
  - Primarily for Defense Research Sciences programs
  - National Defense Education Program increased by 31.6%
  - $10 million added for Navy DURIP
  - 25% increase for Minerva Initiative

- Also increases for applied research and advanced technology development; S&T up 7.6% overall
  - Tens of millions added for AI-related activities
  - Manufacturing tech and related programs OK

- **DARPA** increased by 11.7%, including plus-ups for AI research, hypersonics, other areas

- **Defence medical research** up by 6.9%, including just north of $1 billion for peer-reviewed medical research

---

*Total S&T combines 6.1, 6.2, and 6.3. © 2018 AAAS*
**Department of Energy**

- **Office of Science**: +5.2%
  - Advanced computing has become major shared priority
    - +16% for ASCR, +14% for exascale project
  - Flat or moderate increases for most user facilities; also construction plus-ups
  - $10 million for new microbiome database
  - Fusion research protected: ITER increased by 8%, domestic activities up 5%
  - High Energy Physics and Nuclear Physics: increases of >4% for research accounts; HEP also see construction funding boost

- **Technology programs**:
  - ARPA-E saved again (+4%)
  - Cybersecurity Office established ($120 million)
  - Efficiency & Renewables: +2.5%
    - Hubs and manufacturing institutes (mostly) preserved
  - Nuclear: +10%, integrated university program preserved plus $100 million for SMR support
  - Fossil: +2%, limited changes for CCS; funding for coal pilots and natgas retrofit design study

---

**DOE Office of Science Budgets**

Budget authority, millions of constant FY 2018 dollars

- Basic Energy Sci
- High-Energy Phys
- Adv Sci Comp
- Bio Env Res
- Nuclear Phys
- Fusion Energy

Source: Historical DOE budget data and FY19 appropriations. © 2018 AAAS
NIH: +$2 billion / +5%
- Every institute gets at least an increase of ~3%
- NIA: +20%
  - Alzheimer's research: +$425 million to $2.3 billion total
- Cancer Moonshot up to $400 million (NCI)
- Precision Medicine up to $379 million
- $1.3 billion for opioids-related research
- BRAIN Initiative up to $429 million
- Universal flu vaccine research: +$40 million to $140 million total funding
- Antibiotic resistance research: +$550 million total
- Salary Cap proposals rejected to date
- No consolidation of AHRQ, NIOSH, or NIDILRR

CDC: $50 million Infectious Disease Rapid Response Reserve Fund
- Also $5 million for National Neurological Conditions Surveillance System

Other relevant HHS programs with fairly moderate increases

*Note: FY 2018 figures are omnibus-enacted appropriations. Source: AAAS data, agency budget documents, and appropriations. Adjusted for biomedical R&D inflation rate (BRDPI). Excludes supplemental FY17 Zika proposal and FY15 Ebola funding. © 2018 AAAS
National Science Foundation
- So far: +5% in House, +4% in Senate; all-time funding highs
- "Ten Big Ideas" supported, but with eye to preserving other core research programs as well
- Support for astronomy, plant genomics, EPSCoR, computing, STEM ed, and many other areas

NASA: recent priority
- So far: +4% in House, +3% in Senate
- Science Directorate:
  - +7% in House with increases for Europa and Mars missions, plus WFIRST preserved
  - +3% in Senate with doubling of WFIRST, increase for Heliophysics
- Earth Science, climate programs mostly shielded
- Space Grant, Education office protected from elimination
- Appropriators supportive of lunar orbital gateway and other lunar activities, aeronautics, other technology programs

Department of Commerce:
- NOAA so far: very mixed bag for research programs:
  - Sea Grant protected, ocean research boosted
  - House would eliminate climate research
  - Senate would cut weather and air chemistry research, tech transfer initiative
- NIST so far: protected from cuts, rather limited changes otherwise; $10 million cut to Manufacturing USA in House

FY 2019 House CJS Composition

- NSF, $8.2
- NASA, $21.5
- NOAA, $5.2
- Other Commerce, $6.9
- Other Justice, $21.8
- Other, $4.3
- FBI, $9.3

Based on House committee report. © 2018 AAAS
Other Notes on FY 2019 Appropriations
(all under CR through December 7)

- **Department of Agriculture:**
  - Competitive grants: +4% in House, +1% in Senate
  - Intramural research increases of 5-8%
    - Appropriators seem hesitant on proposal to transfer National Bio- and Agro-Defense Facility (NBAF) ownership from DHS to ARS, but may go along with it
    - Lab closures rejected
  - Flat or moderate increases for most formula funds/capacity grant programs, many of which have been protected from elimination
  - ERS and NIFA moves from DC pressing ahead, several dozen expressions of interest from U.S. cities

- **EPA Science & Tech:** 9% cuts in House across most research areas, minimal changes in Senate
- **U.S. Geological Survey:** +2% in House, flat in Senate
- **DHS:** Modest reductions to S&T Directorate but University Programs, Centers of Excellence protected and flat-funded. Split opinion on new Countering WMD Office.
Select Science & Tech Programs in FY 2019 Appropriations (as of Sept. 17)

Where Are We Headed?

- FY 2019 appropriations:
  - Will get negotiations and final decisions after the midterms

- Next year: cap negotiations one more time for FY 2020 and FY 2021
  - Who controls Congress next year?
  - Will widening deficit impact the negotiations?
  - Caps expire beginning in FY 2022 (funding debate will happen in the 2021 calendar year – the first cycle after the next presidential election)

- How likely is it that the discretionary budget – and thus, research spending – keeps growing?

Federal Spending as a Percent of GDP, 1962 - 2023

Source: Budget of the U.S. Government FY 2019. © 2018 AAAS
Figure 2-1.

Outlays, by Category

Percentage of Gross Domestic Product

Under current law, rising spending for Social Security and Medicare would boost mandatory outlays.

Total discretionary spending is projected to fall as a share of gross domestic product as outlays grow modestly in nominal terms.

At the same time, growing debt and higher interest rates are projected to push up net interest costs.
