2023 F&A Survey Overview

- Prior F&A survey conducted in 2016-2017
- 2023 conducted from January to April 2023
- 119 respondents
- Final reports to be behind COGR firewall
- Public facing reports in aggregate and de-identified
- Institutional resource role of the Survey: Benchmarking!
- Advocacy role of the Survey:
 - Document the subsidy (e.g., "over the cap")
 - Tie to "Cost of Compliance" surveys (Research Security, DMS)
 - Inform 2 CFR 200 revisions

History Check

2010 GAO Report: "University Research: Policies for the Reimbursement of Indirect Costs Need to Be Updated"

Estimated <u>Mean</u> of <u>Proposed</u> Rates for FY 2007:

- DOD (ONR): 51.7% (15 Institutions) HHS: 53.4% (98 Institutions)
- Uncapped administrative rate: 30.9%.
- 83% of Institutions exceeded the Administrative Cap

The GAO recommended OMB to reexamine the 26% admin rate to ensure it "achieves the appropriate level of cost control... that the government bears its fair share of total costs". The recommendation is 'Closed – Not Implemented."

OMB stated in 2012 they would NOT conduct a review. An OMB official believes the cap has helped the schools to be more efficient with their administrative effort.

COGR FY 2023 F&A Survey – Preliminary Data

- Average Capped Rate Proposed: ONR: 57.8% (18 Institutions) HHS: 62.3% (93 Institutions)
- Uncapped administrate rate: 36.4%
- 100% of Institutions exceed the Administrative Cap (114 Institutions)

Cost Burden ...

<u>COGR's NIH Data Management and Sharing (DMS) and the Cost of</u> <u>Compliance Report (May 2023)</u>

For mid-size to large research institutions, the annual projected cost impact is expected to exceed \$500,000 at the central administrative level, while also exceeding \$500,000 at the academic level —a total impact that exceeds \$1 million per institution.

... Cost Burden ...

COGR's Research Security and the Cost of Compliance, Phase I Report (November 2022)

The projected year one average total cost per institution for compliance with the Disclosure Requirements, regardless of institutional size, is significant and concerning.

> The figure ranges from an average of over \$100,000 for smaller institutions to over \$400,000 for mid-size and large institutions.

... Cost Burden ...

2021 Higher Education Research & Development (HERD) Survey (December 2022)

According to the National Science Foundation's National Center for Science and Engineering Statistics (NCSES), in FY2021, the total recovered indirect costs were \$14.7 billion (rounded) and the total unrecovered indirect costs were \$5.9 billion (rounded).

... Cost Burden ...

For smaller and emerging research institutions, the cost burden will potentially become prohibitive to their continued participation in the federal research ecosystem ...

For mid-size research institutions, they will continue to participate, but may choose to retreat from conducting certain types of federally sponsored research ...

For large research institutions, most likely, they will continue full participation, but even they may choose to restructure the composition of their research portfolios ...

As for faculty, investigators, and those aspiring to be researchers, the ever-growing administrative burden required to conduct federally sponsored research has and will continue to lead some to seek other careers that are less complicated ...

And for the United States, our position as the global leader in science and technology will be challenged. Future generations of Americans will bear the cost—a less-creative, less-robust research enterprise that diminishes American ingenuity, imagination, and innovation.

... & Advocacy

- Harmonization across agency policies
- Rulemaking via the Administrative Procedures Act (APA), versus rulemaking by FAQ
- Common sense regulation, emphasizing principle over prescription
- 2 CFR Part 200 (Uniform Guidance)—Section 200.100(c): "The [cost] principles are designed to provide that Federal awards bear their fair share of cost."

• And always ... partnering, anecdotes, etc.
