

COGR Committee Portfolios

Each Committee is responsible for regulatory reform efforts, both proactive and reactive, in its areas of expertise. Committees are also responsible for responses to notices for comment, such as those in the Federal Register, addressing emerging issues, and conducting special studies as needed, all in their areas of expertise. Some issues, such as Science & Security, will involve more than one committee.

Research Security & Intellectual Property (RSIP)	Costing & Financial Compliance (CFC)	Contracts & Grants Administration (CGA)	Research Ethics & Compliance (REC)
