UNIVERSITY ASSOCIATIONS SUPPORT BIPARTISAN STRONGER PATENTS ACT

The Association of American Universities, Association of American Medical Colleges, Association of Public and Land-grant Universities, Association of University Technology Managers, and Council on Governmental Relations today released the following statement regarding the introduction of the STRONGER Patents Act (H.R. 5340) in the U.S. House of Representatives.

We thank Representatives Steve Stivers (R-OH) and Bill Foster (D-IL) for introducing the STRONGER Patents Act, bipartisan legislation that would effectively crack down on abuses of the U.S. patent system while taking steps to improve that system. Universities and medical schools rely on a robust, equitable patent system to ensure research discoveries can be transferred to businesses that can develop them into marketable products that improve our quality of life and fuel the economy. This measure would help ensure the strength of this technology transfer process, which contributes significantly to our nation’s leadership in science and technology. We look forward to continuing to work with Congress, as well as with USPTO Director Andrei Iancu, toward our shared goals of curtailing abusive patent litigation and reinforcing the strength of the U.S. patent system.

Founded in 1900, the Association of American Universities (AAU) comprises 62 distinguished institutions that continually advance society through education, research, and discovery. Our universities earn the majority of competitively awarded federal funding for academic research, are improving human life and wellbeing through research, and are educating tomorrow’s visionary leaders and global citizens. AAU members collectively help shape policy for higher education, science, and innovation; promote best practices in undergraduate and graduate education; and strengthen the contributions of research universities to society. Follow AAU on Twitter, on Facebook and on Linkedin.

Founded in 1876 and based in Washington, D.C., the Association of American Medical Colleges (AAMC) is a not-for-profit association dedicated to transforming health care through innovative medical education, cutting-edge patient care, and groundbreaking medical research. Its members are all 151 accredited U.S. and 17 accredited Canadian medical schools; nearly 400 major teaching hospitals and health systems, including 51 Department of Veterans Affairs medical centers; and more than 80 academic societies. Through these institutions and organizations, the AAMC serves the leaders of America’s medical schools and teaching hospitals and their more than 173,000 full-time faculty members, 89,000 medical students, 129,000 resident physicians, and more than 60,000 graduate students and postdoctoral researchers in the biomedical sciences.
The **Association of Public and Land-grant Universities** (APLU) is a research, policy, and advocacy organization dedicated to strengthening and advancing the work of public universities in the U.S., Canada, and Mexico. With a membership of 237 public research universities, land-grant institutions, state university systems, and affiliated organizations, APLU's agenda is built on the three pillars of increasing degree completion and academic success, advancing scientific research, and expanding engagement. Annually, member campuses enroll 4.9 million undergraduates and 1.3 million graduate students, award 1.2 million degrees, employ 1.2 million faculty and staff, and conduct $43.9 billion in university-based research.

The **Association of University Technology Managers** (AUTM) is the nonprofit leader in efforts to educate, promote and inspire professionals, throughout their careers, to support the development of academic research that changes the world. AUTM’s community is comprised of more than 3,200 members who work in more than 800 universities, research centers, hospitals, businesses and government organizations around the globe.

The **Council on Governmental Relations** (COGR) is an association of over 190 leading research universities and affiliated academic medical centers and independent research institutes. COGR concerns itself with the impact of federal regulations, policies, and practices on the performance of research conducted at its member institutions.
